

## WHY THEY BOUGHT

# Shapeways

**SHAPEWAYS****Location** New York, NY**Application** Industrial service bureau creating prototype parts for clients across a range of industries, from consumer goods to medical devices, specializing in small to micro parts.**Challenges**

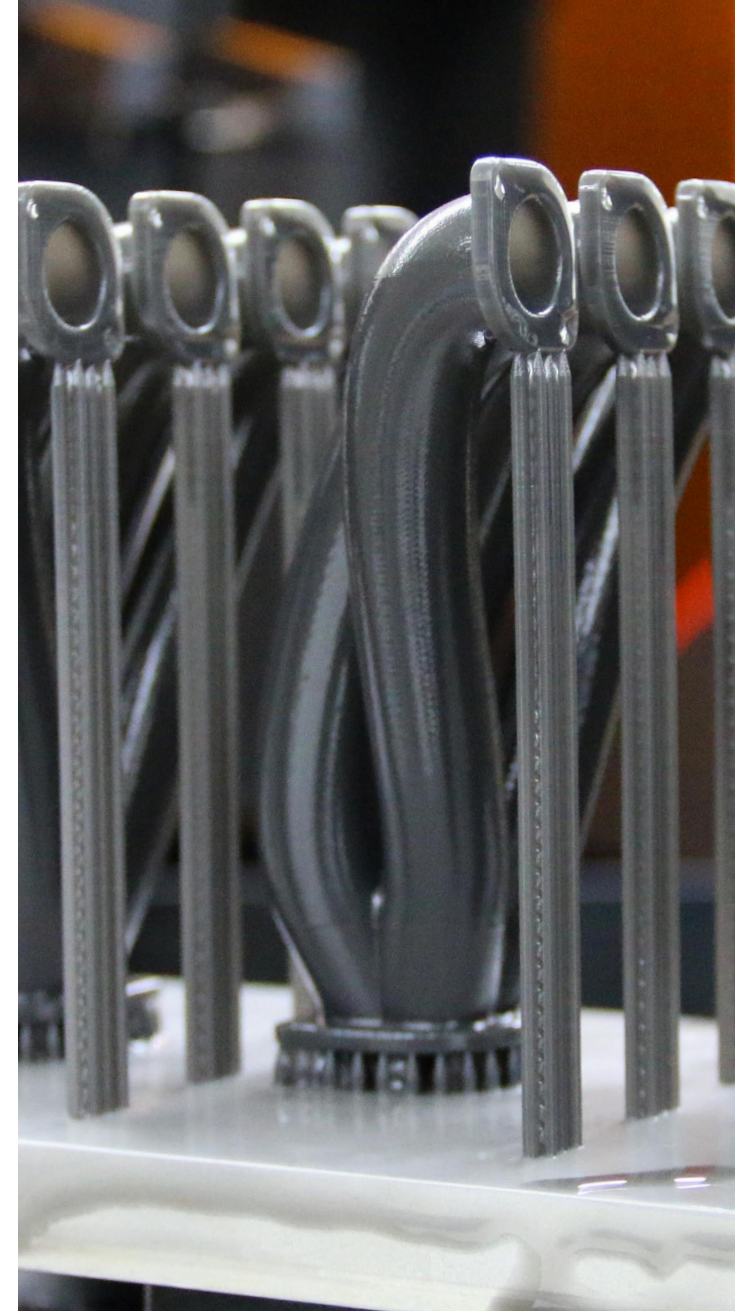

- High-precision is needed to ensure parts meet customer specifications
- Need for rapid design iteration
- Long lead times for small- to medium-volume jobs

**ETEC SOLUTION****System**

- Envision One
- envisionTEC P4K

**Benefits**

- High-resolution printing - as low as 25 $\mu$ m on the P4K – reduce the need for post-processing and ensures accurate parts
- Enabled rapid design iteration
- Enabled faster turnaround of customer parts

“envisionTEC’s open system allows us the opportunity to work with other large industrial players within the material space, such as Henkel.”

Ryan Iwanski, Senior Marketing Manager

“Now that the Envision One technology is an open system, it now allows more material partners access to the cDLM technology.”

Aidan O’Sullivan, VP of Operations
