

WHY THEY BOUGHT UFOEAR

Location DongGuan City, China

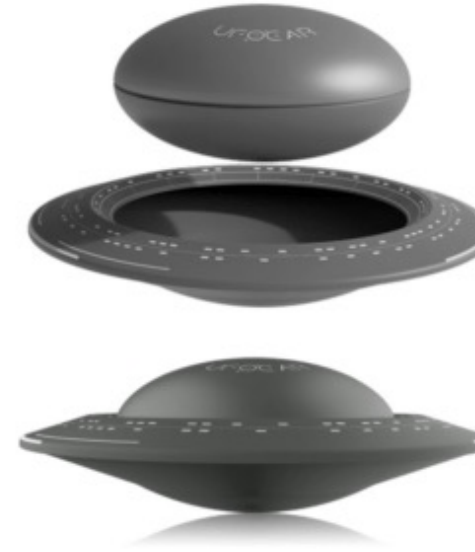

Application A manufacturer of “super reference-class” headphones, for which in-ear fit is critical to delivering rich music detail, high separation of instruments and realistic audio reproduction.

- Challenges**
- High tooling costs and long lead times
 - Assembly consolidation - earphones would normally be made in pieces
 - Need for mass customization to ensure proper fit
 - Need for extremely precise surface finish

ETEC SOLUTION

System envisionTEC P4K

- Benefits**
- Eliminated tooling costs and reduced lead times
 - Assembly consolidation - multiple parts can be created as a single piece
 - Enabled mass customization for individualized fit of headphones
 - Precise surface finish reduced need for post-processing

“We can not only be limited to equipment sales and 3D printing services, but develop more 3D printing applications to help more industries use 3D technology to improve the ability of product development, design and production.”

David Ling, Founder
